

Avishkar Ashok Kesarkar

MERN Stack Developer | React.js Developer | Full Stack Developer
+91 6361484489 | avi.ak.2611@gmail.com | LinkedIn | GitHub

Summary

MERN Stack Developer with 8 months internship experience building scalable web applications. Skilled in React.js, Node.js, Express.js, MongoDB, REST APIs, and Redux Toolkit with strong knowledge of async API handling, performance optimization, and responsive UI design.

Technical Skills

Languages: JavaScript (ES6+), TypeScript, C, C++, Java (basic)
Frontend: React.js, Next.js, HTML5, CSS3, Tailwind CSS, Bootstrap
Backend: Node.js, Express.js, REST API Development
Database: MongoDB, Mongoose, MySQL, Firebase (Firestore, Authentication)
Tools: Git, GitHub, Postman, VS Code, npm, Vercel
Core Concepts: State Management, Async API Handling, REST Architecture, MVC Pattern, API Integration, Error Handling, JWT Authentication, Environment Variables

Experience

MERN Stack Developer Intern Aug 2025 – April 2026
Multispark Technologies

- Developed scalable MERN modules and optimized API integration improving performance by approx. 25%.
- Built reusable React components and managed global state using Redux Toolkit reducing code redundancy.
- Optimized backend queries and structured REST APIs improving data retrieval efficiency.
- Debugged and resolved frontend/backend issues improving application stability and user experience.

Web Developer Intern Jun 2024 – Aug 2024
Noitavvone India

- Developed responsive web pages with API integration and dynamic UI features.
- Resolved UI bugs and ensured cross-browser compatibility across devices.
- Reduced page load time by optimizing assets and improving frontend performance.

Projects

Chatbox AI Application — *React, Redux Toolkit, Node.js, Express* GitHub

- Built full-stack AI chat application with real-time messaging and async API handling.
- Integrated OpenRouter API with secure backend communication using environment variables.
- Implemented retry logic, error handling, and loading states improving user experience.
- Designed responsive UI and managed global state using Redux Toolkit.
- Structured backend using modular architecture for scalability and maintainability.

CRM System — *React, Node.js, MongoDB, JWT* GitHub

- Developed role-based CRM system with JWT authentication and protected routes.
- Designed dashboard for efficient customer data management.
- Optimized MongoDB queries improving performance and data retrieval speed.
- Built scalable REST APIs using MVC architecture for maintainability.
- Implemented secure API handling and input validation for better data protection.

Key Achievements

- Implemented retry mechanisms and robust error handling in AI-based applications.
- Improved API response handling and frontend responsiveness.
- Built secure full-stack applications using JWT authentication and environment variables.
- Maintained and showcased projects on GitHub for professional visibility.
- Followed clean coding practices and version control using Git for team collaboration.

Education

MCA 2023 – 2025

Shivaji University, Kolhapur

BCA 2020 – 2023

Shivaji University, Kolhapur

Technical Strengths

- Full-stack development using MERN architecture
- REST API design, integration, and optimization
- Secure authentication and authorization using JWT
- State management and performance optimization
- Deployment and environment configuration using Vercel
